OUR STORY

Alpha Mining Equipment is a leading manufacturer and supplier of high-quality, all-purpose mining and safety equipment, designed to keep the process of mining, tunnelling and hard rock applications safe in underground environments. Founded by experienced industry specialists Quin and Dan, Alpha Mining Equipment has quickly established itself as a trusted name in field, offering reliable and innovative solutions tailored to the unique requirements of each workplace.

Safety is our top priority at Alpha Mining Equipment. Our team of experts works closely with each mine to develop customised safety solutions that meet the highest industry standards. Alpha provides unique reflective cable straps to suit specific cable management standards, innovative changes in regular signage, revolutionary conveyor belt safety and tradesperson utilisation equipment. All products are designed to keep employees and assets safe in a forever changing environment.

In addition to our commitment to safety, Alpha Mining Equipment is also dedicated to maximising productivity and efficiency. Drawing on our extensive experience in the mining industry, we have developed a range of products that streamline operations. This in turn saves our clients time, money and the ability to mitigate unnecessary tasks by combining target areas of utilisation.

Our product range includes equipment for all stages of the mining process. We use only the highest quality materials and state-of-the-art manufacturing processes to ensure that our equipment is durable, reliable, and cost-effective.

At Alpha Mining Equipment, we pride ourselves on our exceptional customer service. Our team is available to provide expert advice and support to our clients, ensuring that they have the right equipment for their specific needs.

Whether you're looking for innovative safety solutions or cost-effective mining equipment, Alpha Mining Equipment has the expertise and experience to meet your needs. Contact us today to learn more about how we can help your mining operation succeed.

INNOVATING UNDERGROUND SAFETY

UNDERGROUND CABLE STRAP WITH REFLECTIVE DROPPER

Alpha's cable hanging straps with reflective dropper are designed to meet various cable management standards while providing exceptional cable demarcation. These straps not only highlight the cables and particular voltage, but also minimize your risk of damage from machinery interaction.

With our product, you can simplify the task of hanging visibility markers and eliminate the need for additional parts, reducing overall waste. Alpha's cable hanging straps are cost-effective while maintaining highly efficient performance, making them a top choice for any cable management needs. Alpha's manufacturing process is fully compliant with Australian standards, and in conformance with current NATA specifications, all of our products undergo rigorous quality assurance tests.

Alpha's Customers have reported positive feedback surrounding the ability to mitigate the secondary tasks required with demarcation of the cable. Therefore, acquiring greater personnel and machinery utilisation, Lower cost per installation of cable and overall providing a high standard of awareness.

INNOVATIVE SIGNAGE

Alphas signs have been carefully constructed with direct consultation with onsite personnel to gain the best outcomes in regard to warning labels and Information.

Alpha's signs have come on the back of industry improvement, safety alerts, incident and near miss reports. Alpha has used this data to manufacture job specific signs and provide awareness with a high level of safety.

REVOLUTIONARY CONVEYOR SAFETY

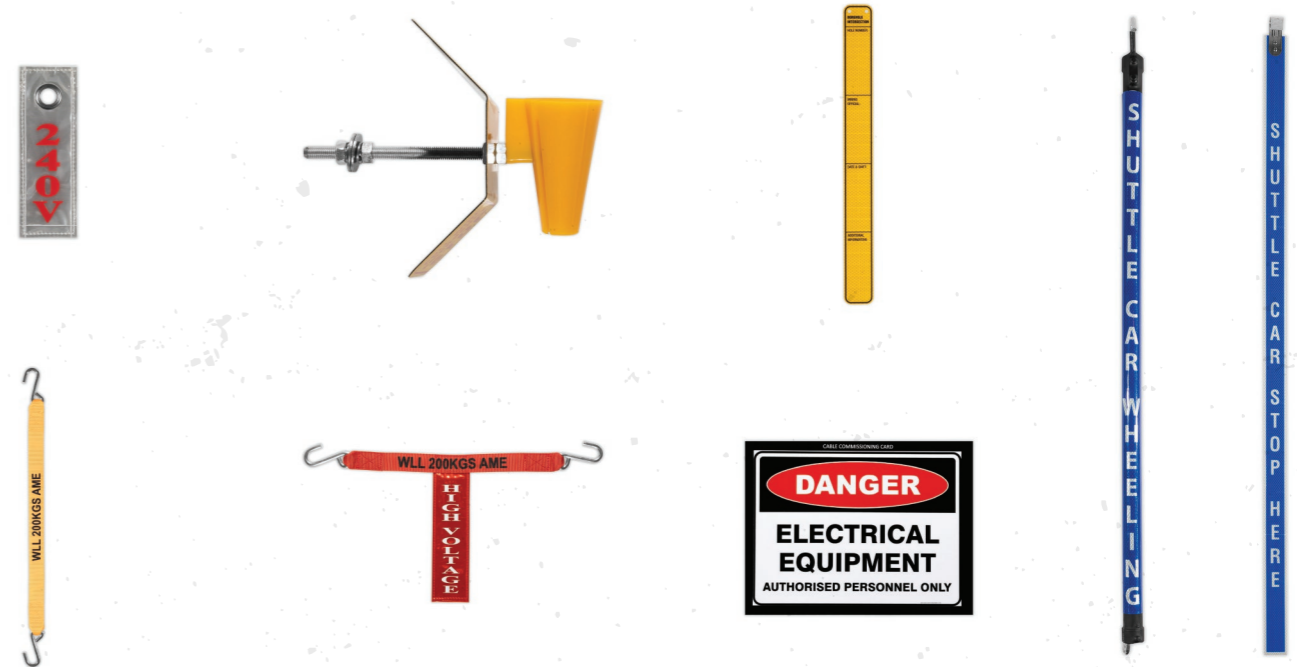

This cutting-edge new design of the directional cone pigtail and attachable warning sign mitigates risk from incorrect install of the directional cones and signage on the signal line. This has mitigated the occurrence of the directional cone being caught and unable to operate pull wire switch.

Alpha provides correct amounts of pigtails and signs to suit the mining application and to minimise unwanted usage waste. Also, it alleviates the need to run lifeline which in turn reduces the risk of lifeline being disconnected, tangled or installed incorrectly. It also mitigates the need for labour, machinery and time to install in potentially dangerous return airways. Elimination in the hierarchy of control is at the fore front of alphas vision when providing products to your organisation.

TRADESPERSON UTILISATION EQUIPMENT

Alpha Provides tradesperson equipment to maximise efficiency with tool belt attachments, cable pouches and Identification cards. This allows the ability to maintain a high standard regarding Australian standards/regulations and site management plans.

Alpha also provides the tradesperson to adequately perform their duty by having the resources available on their person.
