OUR STORY

Alpha Mining Equipment is an Australian-owned manufacturer and supplier of underground mining consumables, supporting coal, hard rock, and civil tunnelling operations across Australia.

Founded by experienced industry professionals Quin and Dan, with over 30 years of combined underground experience, Alpha Mining Equipment was established to deliver practical, site-driven solutions that enhance safety, efficiency, and compliance across underground operations.

We specialise in delivering high-quality consumables and equipment that integrate seamlessly into existing operations. Our approach is grounded in real industry experience, allowing us to understand site requirements and provide fit-for-purpose solutions tailored to each operation.

In addition to our commitment to safety, Alpha Mining Equipment is focused on maximising productivity and efficiency. Through continuous improvement and innovation, we develop solutions that reduce installation time, minimise labour requirements, and lower overall operational costs.

We use high-quality materials and proven manufacturing processes to ensure all products are durable, reliable, and cost-effective. Backed by strong customer support, we work closely with our clients to ensure they receive the right solutions for their specific needs.

OUR CAPABILITIES

Alpha Mining Equipment provides a broad range of underground consumables and support equipment, supporting daily operations, maintenance, and installation activities with a focus on reliability, durability, and consistent performance.

SIGNAGE & COMPLIANCE SOLUTIONS

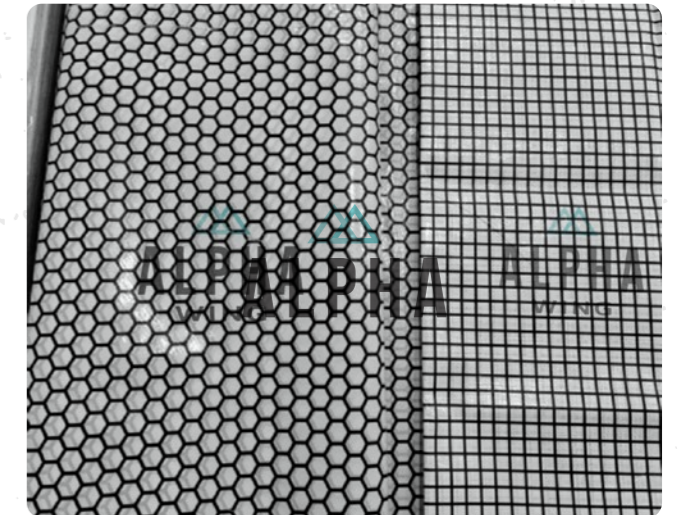

We design and manufacture customised signage solutions, including safety, compliance, and site-specific identification systems. Our signage is aligned with site standards, operational requirements, and regulatory compliance, with the flexibility to deliver custom designs without additional artwork costs.

ACCESS EQUIPMENT – FIBREGLASS LADDERS & SAFETY STEPS

We supply underground-compliant access equipment, including fibreglass ladders, safety steps, and access platforms. These are designed for stability, durability, and safe use in both electrical and underground environments.

VENTILATION SOLUTIONS

We provide ventilation consumables such as brattice and accessories for supporting effective airflow management and maintaining safe underground working conditions.

HIGH SPEED MANUFACTURING

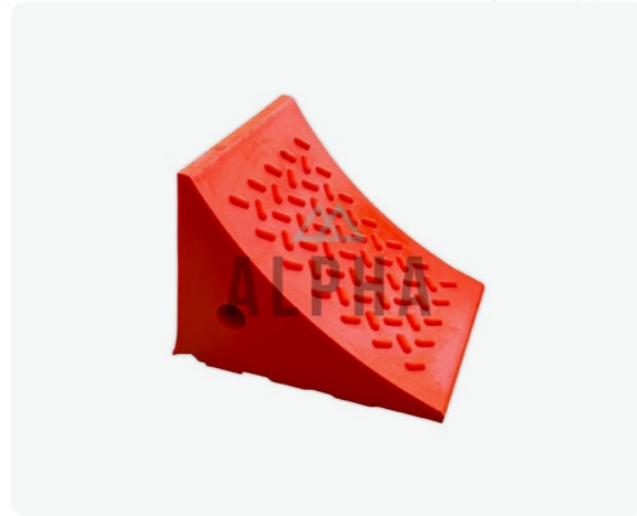

Our high-speed manufacturing capabilities support the efficient production of underground equipment, including cable rollers, steel access ladders, seagulls, hanging brackets, and general site hardware. All products are built for consistency, durability, and fast turnaround.

OUR CAPABILITIES

Alpha Mining Equipment provides a broad range of underground consumables and support equipment, supporting daily operations, maintenance, and installation activities with a focus on reliability, durability, and consistent performance.

POLYURETHANE CAPABILITIES

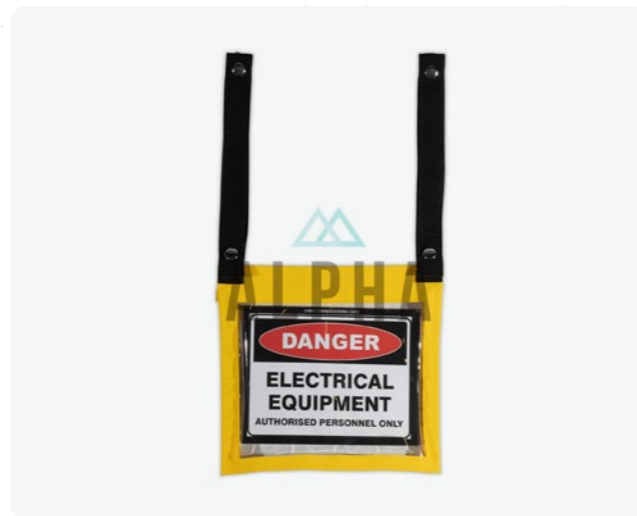

We manufacture polyurethane components for conveyor systems, wheel chocks, and other wear-resistant mining applications, including site-specific engineered solutions designed for high-impact environments.

NYLON & CABLE MANAGEMENT PRODUCTS

Our cable management range includes hanging systems, wheeling road protection, straps-snarkems and tie-down equipment, designed to improve installation efficiency and reduce cable damage.

TEXTILE & UPHOLSTERY SOLUTIONS

We produce durable textile products including tool bags, pouches, belt-mounted equipment, and tradesperson accessories, designed for practicality and ease of use underground.

REFLECTIVE & DEMARCATION SOLUTIONS

We supply high-visibility products for underground demarcation, equipment identification, and compliance applications, improving safety awareness and reducing operational risk.

INNOVATING UNDERGROUND SAFETY

OUR APPROACH

At Alpha Mining Equipment, we focus on delivering outcomes that matter on site by reducing installation time and labour, improving safety outcomes, and standardising consumables across operations. Our approach is designed to lower the total cost of ownership while supporting long-term operational efficiency. We don't just supply products — we provide practical solutions backed by real underground experience.

SUPPLY MODEL

Alpha operates a scalable supply model designed to support ongoing operations. Manufacturing is aligned to site demand, with stock holding in place for repeat-use consumables to ensure consistency of supply. This approach enables reliable delivery with reduced lead times, supported by national distribution from NSW. By structuring our supply model this way, we are able to maintain competitive pricing while ensuring long-term supply reliability across our clients' operations.

MINING OPERATIONS! LEAN & AGILE

OUR COMMITMENT

Alpha Mining Equipment is committed to delivering reliable supply, high-quality manufacturing, and practical innovation, supported by strong site relationships. Our goal is to become a trusted long-term partner, supporting mining operations with consistent, high-performing consumables and equipment.

WHY ALPHA

Alpha Mining Equipment is an Australian-owned, industry-driven business built by underground operators, for underground operations. With proven performance across multiple sites, we provide flexible manufacturing and customised solutions tailored to site requirements. Our strong focus on safety, compliance, and practicality underpins everything we do, allowing us to establish long-term supply partnerships with our clients.
